

Responses to questions from the Tribunal – Réponses aux questions du Tribunal

(a) List of points and issues which the Tribunal would like the parties specially to address during the second round of the hearing

1. Paragraph 4 of the Written Response of the United Kingdom refers to the fact the "Ireland has made public its intention of initiating separate proceedings in respect of the United Kingdom's alleged breach of obligations arising under the EURATOM and EC Treaties". Additional information would be appreciated.
2. Paragraph 10 of the Request of Ireland states: "There have been many independent scientific assessments of the state of the Irish Sea which have concluded that as result of radioactive pollution from Sellafield, the Irish Sea is amongst the most radioactively polluted seas in the World." The Tribunal would appreciate further information on these independent scientific assessments.
3. To what extent would the commissioning of the MOX plant increase the transport by sea of radioactive materials to and from Sellafield facilities?
